

**Staph Pack**  
**Traces, Enhancing your life with Essential Oils**  
[www.TracesEtc.com](http://www.TracesEtc.com)

*Super charge your immune system now! Introducing the Staph Pack to get and keep your Immune System in Superior Shape, \$100 (a savings of \$34).*

School is back in, the weather is chilling, now is the time to get your immune system in shape!

Enhance the ability of your immune system now, along with that of your family and friends before virus, bacteria, and fungal invaders take up residence in your home, work, and schools. The staph pack includes essential oils specifically designed to supercharge your immune system and thwart the spread of germs, virus, and bacteria. Protect your home from this invasion before the bugs start flying!

The Kit includes:

1. **Spice for Life blend**, a favorite and a standby that has proven effective in keeping your body's immune system heightened and ready to thwart the spread of harmful and disease causing germs and viruses. Spice for Life is highly effective in supporting the immune system and good health. Use for immune system support to aid the body when it is most challenged. It is both a viral inhibitor and an immune booster. This is a must have oil blend!
  
2. **Guardian blend** specifically targets fungus, yeast, candida, thrush and other fungal overloads. It works with your body to bring balance to the flora, allowing your body to naturally maintain fungus and yeast in equilibrium. Guardian's fierce energy gives it the notable ability to support and protect the immune system as one of nature's strongest antioxidants. Guardian is a broad spectrum antiviral, antibacterial, and antifungal blend.
  
3. **Defence blend** signals your body to build up defenses against bacterial invasion. When diffused, Defence purifies and cleanses the air from environmental and bacterial impurities. This is especially effective this time of year as the weather cools, our exposure to

germs increases, and stresses of the economic climate weigh upon us. Go to our website: [TracesEtc.com](http://TracesEtc.com), click on library, click on health articles, click on "Getting and Maintaining Health" to read about using these first three oils together to help your body conquer infections.

4. **Tea Tree oil** is gentle, non-irritating, and calming while offering a very powerful immune stimulant. It strengthens the body to fight all three categories of infectious organisms (Bacteria, Fungi, and Viruses). Tea Tree is calm enough to use on young children, 50% dilution, yet strong enough to create a formidable defense against invading organisms.

5. **Eucalyptus is the number one single oil to build up a sluggish immune system!** Eucalyptus compliments the immune and respiratory systems from your head to your lungs. As an expectorant and decongestant, it is a valuable aid for coughs, colds, bronchitis, sore throats, asthma, and other respiratory challenges. Again, Eucalyptus radiata is the number one single oil for improving the immune system (bringing it from low to high).

**All of these immune boosting oils and blends can be diffused to protect hearth and home, they can be applied to feet for overall immune enhancement, or you can use them specifically for your challenges. They are available at a super savings, in our power packed group – The Staph Pack for \$100, an amazing savings of \$34, just in time to supercharge our immune systems! Go to our website, [www.TracesEtc.com](http://www.TracesEtc.com), click on library, click on essential oils, and read more about each of these amazing oils.**
